2009 Vegetable Survey Introduction ..... 1

GA Vegetable Acreage Map by County; Graph by Crop ..... 2

### Georgia State Tables:

Table 1, 2000-2009 Vegetable acreage comparisons..... 3

Table 2, Vegetable acreage ranked ..... 4

Table 3, Vegetable value ranked ..... 4

Table 4, Vegetable acreage by market and cultural practice ..... 5

Table 5, Vegetables grown on bareground, acres and yield ..... 6

Table 6, Vegetables, plastic culture, acres and yield ..... 7

Table 7, Vegetables grown for processing, acres and yield..... 7

Table 8, Vegetables grown for U-Pick, acres and yield..... 7

Table 9, Vegetables grown in greenhouses for sale and transplant..... 7

Table 10, Vegetables grown organically, acres..... 7

### Section 1: Vegetable Acreage by Commodity and County ..... 8-49

Banana peppers, 9	Hot peppers, 22	Southern Peas, 34-35
Bell peppers, 10	Irish potatoes, 23	Spinach, 36
Broccoli, 11	Kale, 24	Sweet corn, 37-38
Cabbage, 12	Lettuce, 25	Sweet potatoes, 39
Cantaloupe, 13-14	Lima beans, 26	Tomato, 40-41
Carrots, 15	Mustard, 27	Turnip greens, 42
Collards, 16-17	Okra, 28	Turnip roots, 43
Cucumbers, 18	Onions, 29	Watermelon, 44-45
Eggplant, 19	Pole beans, 30	Winter squash, 46
English peas, 20	Pumpkin, 31	Yellow squash, 47-48
Green onions, 21	Snap beans, 32-33	Zucchini, 49

### Section 1: Vegetable Acreage by Commodity and County ..... 50-87

Banana peppers, 51	Hot peppers, 62	Southern Peas, 73
Bell peppers, 52	Irish potatoes, 63	Spinach, 74
Broccoli, 53	Kale, 64	Sweet corn, 75-76
Cabbage, 54	Lettuce, 65	Sweet potatoes, 77
Cantaloupe, 55	Lima beans, 66	Tomato, 78-79
Carrots, 56	Mustard, 67	Turnip greens, 80
Collards, 57	Okra, 68	Turnip roots, 81
Cucumbers, 58	Onions, 69	Watermelon, 82-83
Eggplant, 59	Pole beans, 70	Winter squash, 84
English peas, 60	Pumpkin, 71	Yellow squash, 85-86
Green onions, 61	Snap beans, 72	Zucchini, 87

Map of Georgia Cooperative Extension Districts..... 88

## 2009 Vegetable Report Introduction

In 1990, a biennial survey of Georgia Cooperative Extension (CE) Agents was implemented. This survey was intended to provide much needed data on vegetable acreage and yields by cultural practice, season, and irrigation method. The survey was designed to be a comprehensive instrument for gathering data on the various vegetable crops grown in Georgia. The collected data is used extensively by Cooperative Extension as well as by agencies and companies that support the vegetable industry in Georgia.

Users of this report will find that a variety of sources for vegetable acreage, yield, and value are available. In addition to this *Farm Gate Vegetable Report* from the Center for Agribusiness and Economic Development, there is *GA Agricultural Facts* published by the Georgia Agricultural Statistics Service (GASS), and *Census of Agriculture*, produced by the National Agricultural Statistics Service (NASS). CE and GASS figures rarely mirror each other. Reasons for differences abound and are mostly related to data collection methods. CE estimates rely only on reports from Georgia CE County Agents. Estimated yields for the year are available to the agents if they are unaware of local growing conditions. CE estimates do not distinguish between planted and harvested acres, though agents are encouraged to report harvested acres.

**Table 1** -- CE agents reported a total of 161,959 acres of vegetables grown in Georgia during 2009, ranging from broccoli to zucchini with over 40 different vegetables reported. Approximately 92% of these are grown for the fresh market with 8% going to processing. From 2008 to 2009, CE agents reported an overall increase of 7% in vegetable acreage (+10,882 acres). The greatest increases in acreage were reported for Bell Peppers (+2,901 acres) and Watermelon (+2,386 acres), whereas crops with greatest acreage losses included Yellow Squash (-1,298 acres) and Sweet Corn (-1,093 acres).

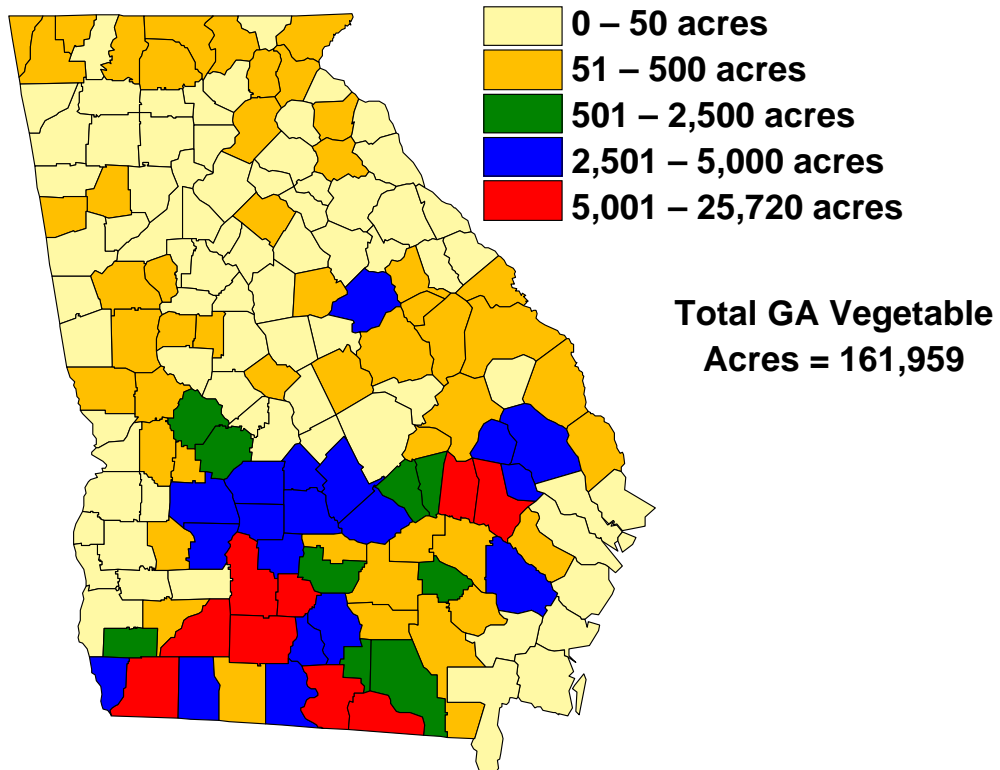

**Tables 2 and 3** -- Vegetable acreage and value ranks show that Sweet Corn surpassed Watermelon to be first in vegetable acreage and Snap Beans were again in third place. Though Sweet Corn had more acreage, Watermelon, Bell Peppers and Onions ranked in the top three for value.

**Tables 4 through 8** -- Acreage and yields are defined by market, cultural practice and irrigation practice. *Spring, bareground, irrigated* vegetables constitute 44% of the total vegetable acres in Georgia.

**Tables 9 and 10** -- Greenhouse vegetables produced for sale and transplant constituted 2,298,176 sq. ft. There were 1,199 acres of organically grown vegetables reported.

The *2009 Farm Gate Value Survey*, from which this vegetable data is obtained, relies on CE agents' reports and attempts to measure value of production at the farm gate for a wide range of commodities in Georgia, including row crops, vegetables, fruits, nuts, poultry, forestry, livestock, ornamental horticulture and other income. To find out more, visit our web site at [www.caed.uga.edu](http://www.caed.uga.edu).

# Georgia Cooperative Extension Districts

The Center for Agribusiness and Economic Development is a unit of the College of Agricultural and Environmental Sciences, combining the missions of research and extension.

## **The Center for Agribusiness and Economic Development**

The Center for Agribusiness and Economic Development is a unit of the College of Agricultural and Environmental Sciences of the University of Georgia, combining the missions of research and extension. The Center has among its objectives:

- ▶ To provide feasibility and other short term studies for current or potential Georgia agribusiness firms and/or emerging food and fiber industries.
- ▶ To provide agricultural, natural resource, and demographic data for private and public decision makers.

To find out more, visit our Web site at: <http://www.caed.uga.edu/>

Or contact:

John McKissick, Director  
Center for Agribusiness and Economic Development  
301 Lumpkin House  
The University of Georgia  
Athens, Georgia 30602  
Phone (706)542-0760  
[caed@uga.edu](mailto:caed@uga.edu)

The University of Georgia and Fort Valley State University, and the U.S. Department of Agriculture and counties of the state cooperating. Cooperative Extension offers educational programs, assistance and materials to all people without regard to race, color, national origin, age, gender or disability.

An equal opportunity/affirmative action organization committed to a diverse work force.

---

**Annual Report**

**AR 10-02**

**June, 2010**

---

Issued in furtherance of Cooperation Extension Acts of May 8 and June 30, 1914, the University of Georgia College of Agricultural and Environmental Sciences, and the U.S. Department of Agriculture cooperating.

J. Scott Angle  
Dean and Director
