Modeling Healthy Eating Behaviors

You can play a large role in helping your family maintain a healthy lifestyle. By demonstrating healthy behaviors for your children, you can encourage them to follow your positive example. Young children learn about the world by watching adults they trust. Children imitate their parents’ behaviors both during play and in their own lives.

You can help your child learn to eat a variety of foods by selecting items from several food groups to complete your own meals. Try to include foods of differing colors on your plate. Talk to your child about the variety of colors and foods groups from which you are eating.

Your child is always watching you, making it important for you to model healthy eating habits. Let your child see you eating breakfast, drinking water, eating a variety of foods, stopping when you’re full, and being physically active.

You can also influence your child’s eating habits by buying and serving a variety of healthy foods. By supplying a variety of foods, you can encourage him or her to try healthy options.

Circular 1037-18, February 2014. Kathryn Tarull, Dr. Diane Bales and Dr. Charlotte Wallinga. The University of Georgia, Fort Valley State University, the U.S. Department of Agriculture and counties of the state cooperating. UGA Extension offers educational programs, assistance and materials to all people without regard to race, color, national origin, age, gender or disability.
